

**CONSENT TO OPERATE ON YOUR COMPUTER**

I, the client, authorize Cybertron and its employees or authorized agents to perform the following procedure(s) on my computer \_\_\_\_\_

As with any change to the system, we understand that there is some risk that the operation of the computer could be compromised. I, the client, assume full responsibility for backing up the computer and restoring data and configuration information to the computer in the event that the procedure Cybertron performs is not successful. I, the client, have confirmed that the recovery procedures for my computer are adequate and function satisfactorily. If Cybertron is not hired to do a full-backup of your system before attempting this operation, Cybertron's obligation will be limited to uninstalling the equipment and/or programs so you, the client, can restore the system's operation, in the event that the procedure is unsuccessful.

An employee or agent of Cybertron has explained the necessity for having adequate recovery procedures in place. They have also explained the nature of the changes that will be taking place for the above mentioned procedure(s). We discussed the possible alternatives to the fore mentioned procedure(s) and the entire process was explained to my satisfaction.

I, the client, understand that all system configuration changes have potential risks. I understand that complications can occur, which suggest the need to do a full backup. All questions regarding the above mentioned procedures were answered to my satisfaction.

I am authorized to make this decision for my company. I hereby extend any and all software licenses necessary to operate my computer and test its function to Cybertron, its employees and authorized agents. I understand that my company will be bound by the licenses and agreements included with the software that may be installed as necessary to complete the fore mentioned procedure pending its success.
